

PRIVATE TRANSPARENCY REPORT **2025**

Amber Infrastructure Group

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The private Transparency Reports, which are produced using signatories' reported information, support signatories to have internal discussions about their practices. Signatories can also choose to make these available to clients, beneficiaries, and other stakeholders.

This private Transparency Report is an export of your responses to the PRI Reporting Framework during the 2025 reporting period. It includes all responses (public and private) to core and plus indicators.

In response to signatory feedback, the PRI has not summarised your responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options that you selected are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT

SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Amber is a leader in specialist infrastructure solutions, developing, investing and managing the vital infrastructure that enables communities to thrive and economies to grow. We are a leading sponsor, fund manager and asset manager of public and private infrastructure projects and associated businesses.

At Amber, we see ourselves as long-term stewards of our clients' capital and this philosophy leads us to focus on the long-term prospects for our investments. Consideration of Environmental, Social and Governance ('ESG') drivers is a critical part of how we assess the long-term viability of investments and is important to us for the following key reasons:

- ESG drivers present an opportunity for new markets and investments. In response to evolving environmental and social challenges, there are increasing numbers of businesses, regulatory regimes and technologies being developed to help solve these challenges. For example, drivers like climate change are leading to innovation in renewable energy generation and the development of disruptive business models. By seeking out emerging businesses, regulatory regimes and technologies that are being driven by ESG factors, we can position ourselves to be at the forefront of new investment opportunities.

- Incorporating ESG supports our high standards of financial rigour and requirements for long-term financial performance. Incorporating ESG into investment decision-making and stewardship does not change our approach to demanding the highest levels of financial rigour for all our investments. In fact, we firmly believe that a foundation of sound governance combined with positive management of environmental and social factors will improve the whole life performance of the funds and investments we develop and manage.

- By investing in infrastructure and associated businesses, we can meaningfully support sustainable development. The infrastructure we invest in determines how healthy and productive communities can be, both now and in the future. For example, by investing in public transport systems, local communities can choose to use a healthy, clean way of commuting to work or for leisure. By investing in the right sort of infrastructure, we can support communities to preserve or improve their economy, the quality of their environment, and their residents' health and well-being.

As long-term investors, we recognise the need to have a considered view of how a changing world could impact our core business activities and long-lasting operations. Amber Horizons is our flagship sustainability and innovation programme that challenges our business to take the long-term view and consider all aspects that can impact performance and create opportunity.

The transformation of the global energy system needs to accelerate substantially to meet the objectives of the Paris Agreement to limit the rise in average global temperatures to well below 2°C, and ideally to 1.5°C. Amber is committed to supporting the objectives of the Paris Agreement and aims to drive climate action in three key areas: developing and investing in green energy infrastructure; supporting net zero solutions; and aligning our activities with the Paris Agreement Objectives.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

As long-term investors, we recognise the necessity of considering how an evolving world may influence our core business activities and investments. Our sustainability approach acknowledges the intricate connection between financial and non-financial factors. By leveraging analytics and engaging with thought leaders, we aim to anticipate potential challenges our investments might encounter. Our objective is to ensure that our investments remain robust under a variety of.

In 2024, Amber has made significant strides in several key areas of our ESG strategy:

- GHG Emissions and Reduction Initiatives Amber has been collaborating with its social infrastructure project partners to undertake net zero feasibility studies and to identify opportunities for decarbonisation. As part of this initiative, in the second half of 2024, a mounted solar PV array was successfully installed at Ryburn Valley High School, part of the Calderdale Schools portfolio. The PV array is expected to generate approximately 235 MWh of electricity annually.
- Net Zero Amber as part of its joint venture partnership Transmission Capital Services ('TCS'), which manages offshore transmission assets ('OFTOs'), developed an approach to net zero and progress the assets to the status of 'Aligning' to a net zero pathway under the Net Zero Investment Framework 2.0 ('NZIF'). Amber with TCS developed a net zero policy. In addition, Amber conducted a GHG forecasting exercise across the OFTO portfolio, projecting scope 1, 2 and 3 emissions out to 2030, including a business-as-usual scenario model as well as a scenario that incorporates feasible and planned decarbonisation initiatives. Going forward, the Company will track the emissions performance of the OFTO portfolio and benchmark it against a Science-Based Target initiative ('SBTi') 1.5 °C absolute contraction pathway.
- Investor Engagement We maintain active engagement with investors on ESG topics. During the reporting period Amber engaged with a number of investors on the topic of the UK Financial Conduct Authority's ('FCA') Sustainability disclosure and labelling regime ('SDR').
- Anti-greenwashing During the year, Amber rolled out anti-greenwashing training to its employees, which covered the content of the FCA's anti-greenwashing rule. Amber implemented this training to ensure its employees remain fully equipped to adhere to anti-greenwashing rules and maintain their commitment to providing stakeholders with clear, balanced, and substantiated information regarding investments' sustainability performance and characteristics.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?
 - Net Zero Pathway Amber will continue to offer technical support to investments and clients that choose to align with the NZIF net zero infrastructure criteria. This includes assisting investments that elect to make net zero commitments by supporting carbon forecasting and helping to develop Paris-aligned decarbonisation pathways tailored to the specific investment and sector.
 - Decarbonisation initiatives Across its mandates, Amber will support efforts to decarbonise investments—such as social infrastructure building assets—where this is a priority for clients and investees. This may involve identifying funding opportunities and collaborating with facilities management companies to pursue cost-effective upgrades that also deliver environmental benefits.
 - EU Taxonomy Alignment Continue to progress the assessment of investments' alignment with the EU Taxonomy Regulation's six environmental objectives, ensuring investments pass the Do No Significant Harm ('DNSH') tests and meet Minimum Safeguards criteria.
 - Climate risk Amber intends to update its physical climate risk screening approach, exploring the integration of new climate models and additional climate hazards, such as heat, where relevant to client or investment priorities.
 - Social and Governance Initiatives Ensure all investments adhere to high standards of corporate governance, aligning with UN Global Compact Principles where relevant.
 - Environmental Performance Continue initiatives to enhance the environmental performance of investments, with a focus on reducing greenhouse gas emissions, improving energy efficiency, and promoting sustainable resource management.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Gavin Tait

Position

Chief Executive Officer

Organisation's Name

Amber Infrastructure Group

☒ A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

- ☐ (AH) Other
- ☐ (AI) Other

- (AJ) Not applicable; our organisation did not report to any voluntary responsible investment/ESG frameworks during the reporting year.

Additional context to your response(s): (Voluntary)

As the Investment Adviser to the International Public Partnerships ('INPP') fund, Amber Infrastructure ('Amber') quantified and disclosed INPP's portfolio alignment with the criteria of the Net Zero Investment Framework (NZIF) 2.0 during the reporting period. In addition, Amber has supported INPP to establish and deliver against two net zero KPIs which apply the principles of the NZIF framework's portfolio coverage target.

PGS 4	PLUS	PGS 1	N/A	PUBLIC	Responsible investment policy elements	1 – 6

Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?

☒ (A) Yes

Elaborate:

Responsible investment is an essential part of the strategic positioning and management of Amber managed or advised funds. As a global investor, consideration of ESG drivers is an integral part of how Amber assesses the long-term viability of the investments it makes. Incorporating ESG into Amber's management processes supports its high standards of financial rigour and requirements for long-term financial performance. Amber firmly believes that a foundation of sound governance combined with positive management of environmental and social factors will improve the whole-life performance of the investments it develops and manages. The link between our responsible investment activity and our fiduciary responsibilities is reflected in our ESG objectives:

1. Drive sustainable growth. We will seize ESG drivers as an opportunity to grow new markets and commercial opportunities.
2. Integrate ESG considerations into all aspects of our business. We will identify and integrate ESG factors into all aspects of our investment, development and management decision making and analysis to protect and enhance value.
3. Advance environmental and social progress. We will actively work towards improving the environmental and social performance of our funds, investments and business operations by focusing on material ESG issues and sustainable development goals.

We will deliver these objectives by conducting our business in a manner that creates strong financial returns whilst also creating positive impacts on the environment and society.

Does your organisation have governance processes or structures to ensure that your overall political engagement is aligned with your commitment to the principles of PRI, including any political engagement conducted by third parties on your behalf?

☒ (A) Yes

Describe how you do this:

As an investor in regulated assets, Amber regularly engages with regulators on broader policy topics. Amber is committed to complying with all applicable laws and maintaining strong principles of corporate governance and ethical standards of conduct across its business. Amber's Code of Conduct requires employees to always deal with all stakeholders, including political or regulatory bodies, in a manner that is diligent, fair, honest, and respectful.

Amber has a Whistle-Blower policy in place, to encourage the reporting of any potential wrongdoing against its commitments. The policy is communicated to all employees and contractors during inductions and other relevant training programmes, together with practical advice on identifying and preventing any improper conduct which may be reportable under the Policy.

As part of Amber's risk policies, the company does not make any donations to any political parties. Employees and their associated persons are also not permitted to make any political donations on behalf of Amber. In addition, due consideration to political exposed persons and individuals political opinions are duly considered and robustly managed as part of Amber's money laundering and data processes and policies.

- ☐ (B) No
- ☐ (C) Not applicable, our organisation does not conduct any form of political engagement directly or through any third parties

Third party due diligence providers

- (C) We do not have any internal or external roles with responsibility for implementing responsible investment

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 13	CORE	PGS 11	N/A	PUBLIC	Roles and responsibilities	1

Does your organisation use responsible investment KPIs to evaluate the performance of your board members, trustees, or equivalent?

☒ **(A) Yes, we use responsible investment KPIs to evaluate the performance of our board members, trustees, or equivalent**

Describe: (Voluntary)

Amber completes a formal (at least annual) review of work performance, which is led by a relevant Line Manager/ Executive peer. This allows employees to discuss progress with management, record any comments, and discuss plans for development. Equally, it is an opportunity to set objectives for employees, including specific ESG criteria.

Where relevant, each employee, including at an Executive level, will have an overarching objective for ESG performance and contributing to the development of Amber 's' sustainability strategy. Specific objectives are then tailored for the respective role and how individuals can support the overall approach to investment and stewardship of investments and/or Amber's day-to-day operations. For example, members of Amber's low-carbon funds have specific objectives that link investment opportunities to carbon reduction targets, whereas asset managers will have objectives to deliver specific ESG initiatives on assets directly managed by Amber.

- (B) No, we do not use responsible investment KPIs to evaluate the performance of our board members, trustees, or equivalent

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 14	CORE	PGS 11	N/A	PUBLIC	Roles and responsibilities	1

Does your organisation use responsible investment KPIs to evaluate the performance of your senior executive-level staff (or equivalent), and are these KPIs linked to compensation?

☒ **(A) Yes, we use responsible investment KPIs to evaluate the performance of our senior executive-level staff (or equivalent)**

Indicate whether these responsible investment KPIs are linked to compensation

☒ **(1) KPIs are linked to compensation**

- (2) KPIs are not linked to compensation as these roles do not have variable compensation
- (3) KPIs are not linked to compensation even though these roles have variable compensation

Describe: (Voluntary)

Incentivising our staff to support our sustainability objectives is a priority for our business. Where relevant to their role, staff have had sustainability performance objectives implemented. Members of our origination, asset management and investor relations teams are required to complete a response to how they have supported the ESG objectives of the business. Specific ESG targets are then agreed with line managers, where relevant to their roles. Targets are formally reviewed on an annual basis; however, line managers are encouraged to conduct regular check-ins on progress as part of ongoing employee engagement.

- (B) No, we do not use responsible investment KPIs to evaluate the performance of our senior executive-level staff (or equivalent)

Additional context to your response(s): (Voluntary)

	(4) Real estate	(5) Infrastructure
(A) Maximise our portfolio-level risk-adjusted returns. In doing so, we seek to address any risks to overall portfolio performance caused by individual investees' contribution to systematic sustainability issues.	☒	☒
(B) Maximise our individual investments' risk-adjusted returns. In doing so, we do not seek to address any risks to overall portfolio performance caused by individual investees' contribution to systematic sustainability issues.	☐	☐

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 23	PLUS	OO 5, OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

Amber engages with investments on environmental, social and governance matters. Depending on the mandate, and client requirements, Amber is able to develop targets for investee companies, including the following topics: environmental performance; health and safety performance; greenhouse gas management; and corporate governance. Amber's asset management team is responsible for monitoring assets and typically provide formal monitoring reports on a quarterly basis. This sustainability data helps Amber's ESG and asset management teams to identify investments to prioritise engagement with, based on material risks and opportunities. The way Amber manages the investment varies according to investment type is summarised below:
Operating businesses Amber actively engages through Board Director positions, supported by its specialist asset management team at a hands-on operational level (rather than solely at a governance level) to ensure material ESG issues are being dealt with appropriately by the management teams of the underlying investments.

Public-private partnerships Amber actively manages material ESG factors through its specialist asset management team and oversight of third-party contractors. This applies to both construction and operational assets. Senior debt Engagement on material ESG risks is typically concentrated in the screening and due diligence phase. Where Amber provides senior debt (predominantly through our MEEF, LEEF and SPRUCE funds), we monitor performance in line with fund requirements. Governance arrangements are guided by the type of investment and ownership structure, as opposed to the sector, which typically drives the management of environmental and social aspects. All investments must meet Amber's minimum ESG requirements and work towards Amber's sustainability policy aims.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 27	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How are your organisation's stewardship activities linked to your investment decision making, and vice versa?

Our approach to sustainability and ESG integration helps us identify, assess, manage, monitor and disclose material ESG risks and opportunities across the investment lifecycle. We do this through activities such as transaction screening, due diligence, execution, active management, reporting and optimisation to exit. The screening and due diligence stages feed directly into the investment decision-making process, with the outcomes of these activities being considered by the Investment Committee for all investments. The main pre-investment stewardship activities are summarised below:

Screening All investments are initially screened for ESG 'red flags' and categorised based on potential risks and adverse impacts. Screening also includes considering EU Taxonomy eligibility, Sustainable Finance Disclosure Regulation ('SFDR') categorisation requirements and positive contributions towards the Sustainable Development Goals ('SDGs').

Due Diligence Potential investments undergo bespoke due diligence, guided by the investment's location, asset type and risk profile. Our deal teams work closely with our ESG team to develop comprehensive ESG due diligence scopes to ensure aspects such as EU Taxonomy, SFDR and TCFD requirements are considered prior to investment. Any items that require addressing post-investment are built into Environmental and Social Action Plans ('ESAP') where possible.

Execution Amber seeks to build ESG clauses into documentation with portfolio companies, including ESAPs prepared at the due diligence stage. This includes any actions required to ensure environmental and social safeguarding or more ambitious targets such as alignment with EU Taxonomy Technical Screening Criteria or net-zero strategies.

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

The Amber-advised International Public Partnerships ('INPP') is a leading investor in the UK offshore transmission sector, with 11 OFTO investments capable of powering an estimated equivalent of 3.7 million homes by renewable energy.

The OFTO assets are in scope of INPP's KPI to support investments to meet the criteria of the Net Zero Investment Framework 2.0 ('NZIF'). During the period, Amber worked with Transmission Capital Services ('TCS') which manages the operation of the OFTO assets, to develop an approach to net zero and progress the assets to the status of 'Aligning' to a net zero pathway – under the NZIF framework.

As an initial step Amber worked with TCS to develop a net zero policy covering the OFTO assets, which sets out an ambition to decarbonise the operational activities and to work towards net zero, wherever economically feasible and practical.

Amber conducted a GHG forecasting exercise across the OFTO portfolio, projecting scope 1, 2 and 3 emissions out to 2030, including a business-as-usual scenario model as well as a scenario that incorporates feasible and planned decarbonisation initiatives. Going forward, Amber will track the emissions performance of the OFTO portfolio, disclosed by TCS on an annual basis, and benchmark it against a Science-Based Target initiative ('SBTi') 1.5 °C absolute contraction pathway.

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

In support of the UK Government's 2050 net zero target, Amber is supportive of the transition to net zero across its social infrastructure sector investments. As Investment Adviser to INPP, Amber's Asset Management and ESG teams have been collaborating with Facilities Management Companies ('FMCo') operating across its various social infrastructure projects, to undertake net zero feasibility studies and to identify opportunities for decarbonisation. In the second half of 2024, a mounted solar PV array was successfully installed at Ryburn Valley High School, part of the Calderdale Schools portfolio.

The project, which saw the installation of 250 kW of solar PV on the school's rooftop, was designed in partnership with the project company, managed by Amber and Mitie (the 'FMCo'), and was delivered in-house by Mitie Group companies. In addition to the solar installation during the period, the lighting across the whole of the Ryburn Valley High School was upgraded to LEDs, which further enhanced the school's energy efficiency.

When combined with the solar PV system, total savings on electricity costs are projected to exceed £60,000 per year. Beyond financial savings, the project contributes to substantial carbon reduction. By reducing grid electricity consumption, the carbon savings will be an estimated 49.5 tCO₂e in the first full year of operation.

The PV array is expected to generate approximately 235 MWh of electricity annually. The majority of this clean energy will be consumed on-site, reducing reliance on grid electricity. Based on 2023 tariff rates, the school anticipates annual savings of approximately £40,000, with a projected payback period of just six years.

Amber looks to work with our public sector partners and industry bodies wherever possible to leverage complementary competencies and foster innovation in addressing society's complex infrastructure challenges. In line with this aim, Amber supported University College London ('UCL') with a Department for Energy Security and Net Zero ('DESNZ')-sponsored project to develop the National Building Database for energy performance to aid policy decision-making and the transition to a net-zero economy. With a need for granular data on educational buildings, the Company provided the energy experts supporting UCL with access to two of its school assets, to undertake energy and carbon assessments. The output of the assessments providing valuable information for the development of the database. analysis within days and began a claim with the tracker manufacturer.

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

- ☐ (A) Yes, within our standard planning horizon
- ☒ (B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Physical Risk For the Amber-advised International Public Partnerships ('INPP') fund we engaged the catastrophe modelling experts Moody's RMS to develop a bespoke infrastructure climate risk assessment tool. For physical risk, the importance of scenario choice depends on the timescale of INPP's investments. Before about 2040, the different scenarios do not result in detectable differences in global warming. Amber therefore adopted the following recommendations for the INPP investment portfolio:

- For all investments, we consider present-day climate risks;
- For investments with remaining lifetimes of 10-20 years, we consider one quantitative modelling scenario; and
- For investments with remaining lifetimes > 20 years, we consider at least one high and one low physical risk scenario -

Representative Concentration Pathway ('RCP')4.5 and RCP8.5.

The RCP8.5 (Business-as-Usual or 'BaU') corresponds to 3.7 degree Celsius rise by end of the century due to low or no effort to reduce emissions; and RCP4.5 (Middle Path) corresponds to 1.8 degree Celsius rise by end of the century due to moderate efforts to reduce emissions. Under these scenarios up to five priority climate hazards are assessed.

101 investments (including 295 individual locations) within INPP's portfolio have been screened. The vast majority (100) were assessed as extremely low or very low risk. One UK-based investment was assessed to be at low risk due to one of the locations being at a higher risk of flooding. Although not financially material to INPP, Amber will engage with the relevant local authority to support the development of an appropriate mitigation strategy.

Transition Risk For transition risk, INPPs investments have been assessed qualitatively under a BaU and 2°C Transition scenario, as advised by the third-party adviser Willis Towers Watson ('WTW'). BAU encapsulates current market expectations whilst the 2°C Transition scenario captures the structural changes required to limit warming to well below 2°C above pre-industrial levels. The qualitative comparison of the two scenarios shows the directional impact of a transition on relevant financial metrics.

Only a few of INPP's assets were assessed to face transition risks due to the nature of their contracted or regulated returns. A large portion of INPP's investments are availability-based assets where the cash flows are based on making the asset available in a pre-agreed manner. The cash flows from such investments are largely insulated from changes to the net zero transition but may require the Company to support its public sector clients deliver any variations required due to a change in legislation.

Several investments were found to have material transition opportunities. For example, offshore wind generation in Europe (and globally) will be higher in a transition scenario than in a BAU scenario, providing INPP with the opportunity to expand its portfolio of offshore transmission ('OFTO') investments. Similarly, rail passenger demand in a climate transition scenario, compared to a market expectations scenario, is expected to rise in many parts of the world and would present opportunities for INPP to further its investments into different stages of the rail value chain.

- (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

● **(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities**

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Amber aims to integrate climate risks and opportunities throughout the investment lifecycle. Amber's Investment Committee ensures that climate change risks and opportunities have been appropriately considered through the investment and divestment processes. This ensures that each investment has considered climate change risks and opportunities. Amber's ESG Committee monitors its approach to climate change, including consideration of climate change strategy, disclosures and targets.

For example at the pre-investment stage, Amber has strengthened its due diligence requirements for the Amber-advised International Public Partnerships ('INPP') to help assess climate risks and opportunities for all new investments. Depending on ESG categorisation, investments are now required to:

- Assess EU Taxonomy eligibility and alignment;
- Apply climate risk screen using our bespoke climate risk tool developed with catastrophe modelling experts Moody's RMS; and
- The results of the assessment will be used by Amber's Asset management team and the investment management teams to continue to develop and inform risk mitigation.

Amber's Risk Committee monitor risks annually, noting any material changes to the current assessment. Where an 'Asset-level Assessment' indicates material physical risks, risk management options are identified to manage the risks to the asset and/or portfolio to acceptable levels. Options include: avoid; mitigate; transfer (including insurance); accept; divest; diversify; and hedge.

In addition, the results of our climate risk assessment are used by Amber's asset management team and the investments management teams to develop and inform risk mitigation strategies over time, increase climate resilience and create value. Amber aims to engage with investee companies to support them in undertaking a transitional climate risk assessment in line with TCFD recommendations.

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Additional context to your response(s): (Voluntary)

-

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 42	PLUS	N/A	N/A	PUBLIC	Climate change	General

Which sectors are covered by your organisation's strategy addressing high-emitting sectors?

☒ **(A) Coal**

Describe your strategy:

Amber will not invest into new projects in the coal sector under existing mandates due to climate change considerations and risk of stranded assets.

☒ **(B) Gas**

Describe your strategy:

Amber supports global ambitions to reduce emissions and believes that natural gas has an important role to play in transitioning Net Zero carbon economy. This is due to the role that gas can play in transitioning from coal in countries where coal is currently the main source of baseload power and also the role that gas transmission and distribution companies can play in the roll out of low carbon fuels, including biomethane and clean hydrogen.

Amber seeks to consider the objectives of the Paris Agreement. As part of this effort, Amber has enhanced its screening and due diligence processes to ensure new investments are aligned, or can directly support, the transition to Net Zero.

- ☐ (C) Oil
- ☐ (D) Utilities
- ☐ (E) Cement
- ☐ (F) Steel
- ☐ (G) Aviation
- ☐ (H) Heavy duty road
- ☐ (I) Light duty road
- ☐ (J) Shipping
- ☐ (K) Aluminium
- ☐ (L) Agriculture, forestry, fishery
- ☐ (M) Chemicals
- ☒ **(N) Construction and buildings**

Describe your strategy:

Amber seeks to influence all investments in relation to climate mitigation. The degree to which Amber is able to influence varies depending on investment type and shareholding.

For construction projects, Amber looks to integrate climate mitigation considerations at the earliest possible stage, including providing recommendations for best-practice design guidelines to be applied, such as the principles of the PAS 2080 standard - carbon management in infrastructure.

Amber also seeks to build ESG clauses into documentation with portfolio companies, including Environmental and Social Action Plans that are prepared at the due diligence stage. May include actions for the operation of the building to align with the EU Taxonomy Technical Screening Criteria for buildings.

Amber is an active member of the UK's National Infrastructure and Service Transformation Authority ('NISTA') Net Zero Working Group, aimed at establishing a net zero strategy for Private Public Partnership ('PPP') investments in the UK. The group has collectively supported the development of a sector-specific net zero stewardship guidance document and agreed on a streamlined approach to carbon data collection and quantification and site-level net zero feasibility studies.

- ☐ (O) Textile and leather
- ☐ (P) Water
- ☐ (Q) Other
- ☐ (R) We do not have a strategy addressing high-emitting sectors

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 43	CORE	N/A	N/A	PUBLIC	Climate change	General

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- ☐ (A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)
- ☐ (B) Yes, using the One Earth Climate Model scenario
- ☐ (C) Yes, using the International Energy Agency (IEA) Net Zero scenario
- ☒ **(D) Yes, using other scenarios**

Specify:

Amber has developed a climate risk assessment framework, which includes the use of scenario analysis to assess both the transitional and physical risks and opportunities of its investments. Amber has applied this framework, including the use of climate scenarios, to the Amber-advised International Public Partnerships ('INPP') investment portfolio. As part of this assessment, Amber screened all assets with at least a 10-year remaining investment horizon, and constituting at least 1% of the projected portfolio value, for physical climate risk under future climate scenarios (including those classified as high risk from the 'Quantitative Screening: Present day' step). Amber applied an RCP4.5 and RCP8.5 for scenario analysis.

Transition risk has been assessed qualitatively under a Business-As-Usual ('BAU') and 2°C Transition scenario. BAU encapsulates current market expectations whilst the 2°C Transition scenario captures the structural changes required to limit warming to well below 2°C above pre-industrial levels. The qualitative comparison of the two scenarios shows the directional impact of a transition on relevant financial metrics

- (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

☒ (A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Physical risks As part of its climate risk assessment framework, Amber has a process to assess physical climate risks and opportunities at the individual asset level, which has been applied to the Amber-advised International Public Partnerships ('INPP') fund. This process assessment includes the following steps:

- Qualitative screening - The portfolio is initially screened qualitatively against a longlist of 13 climate hazards
- Quantitative screening, present day - Potential at-risk locations are quantitatively screened for present day physical climate impacts, using Amber's bespoke climate risk screening tool developed by Moody's RMS
- Quantitative screening, future scenarios - Screening for physical risks under potential forward-looking scenarios is conducted using RMS's screening tool, for the hazards and geographies currently available
- Asset-level assessments - Higher risk assets identified at the 'Quantitative Screening: Present Day' step or the 'Quantitative Screening: Future Scenarios' step undergo an Asset-Level Risk Assessment. The below summarises Amber's process to consider the transitional climate risks of individual investments:

Transition risks

- Qualitative screening - Assets are initially screened qualitatively according to sector-level transition risk scenarios that compare transition risks and opportunities under a transition vs. business-as-usual scenario
- Asset-level assessment - For those assets where climate transition could potentially affect cash flows directly, a deep-dive risk assessment is conducted by the portfolio companies

(2) Describe how this process is integrated into your overall risk management

By way of example, Amber has developed the following process for integrating the output from its climate risk assessment into the risk management approach for INPP:

Risk Identification The INPP Board, Audit and Risk Committee and the Risk Sub-Committee identify risks with additional input from Amber. Key risks are identified at the investment approval stage, where the investment papers include an assessment of key risks as well as potential mitigations. This reflects work performed at the due diligence phase, incorporating input where relevant from specialist advisors appointed to support the investment process.

For new investments, the identification of climate-related risks (physical or transition) and the potential impact (positive or negative) are mandatory requirements of the investment process. The potential impacts are screened using the Moody's RMS tool. Where investments are considered to be higher risk, Amber will draw on the support of Technical Advisers to further consider the potential risks and opportunities.

For existing investments, the INPP Board receives detailed quarterly asset management reports highlighting performance and potential risk issues on an investment-by-investment basis. The Audit and Risk Committee has an open dialogue with its advisers to assist with the assessment of significant risks, if any, that might arise between reporting periods. A risk register is reviewed and updated by the INPP Board and Audit and Risk Committee on a quarterly basis. An annual workshop with Amber considers emerging risks and assessment of the current risks.

☒ (B) Yes, we have a process to manage climate-related risks

(1) Describe your process

Each identified risk is assessed in terms of probability of occurrence, the potential impact on financial performance and any movements in the relative significance of each risk between periods. The assessments build on the wealth of knowledge acquired by Amber through both bidding and asset management phases, with risk assessments carried out to quantify and assess risks. Amber has developed the following risk management actions, which has been applied to the INPP fund, to reduce financial risks:

- Avoid: New high climate risk investments
- Improve: Climate risk of existing investments
- Divest: High risk investments
- Diversify: To manage portfolio/company level risk
- Hedge: Risks that cannot be improved/ divested
- Insure: Risks that cannot be otherwise managed

(2) Describe how this process is integrated into your overall risk management

Mitigation Plan For newly identified risks or existing risks with increased likelihood or impact, the Amber-led Audit and Risk Committee assists INPP in developing an action plan to mitigate the risk, with enhanced monitoring and reporting put in place. Risk Monitoring, Reporting and Reassessment Risks are monitored and risk mitigation plans are reassessed by Amber's Audit and Risk Committee, where applicable, with input from any relevant key service providers, and reported to the INPP Board on a quarterly basis. Annual external controls and process reviews help ensure the robustness of control processes. ESG monitoring and reporting is included as part of this process.

- (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments

HUMAN RIGHTS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49	PLUS	PGS 47	PGS 49.1	PUBLIC	Human rights	1, 2

During the reporting year, what steps did your organisation take to identify and take action on the actual and potential negative outcomes for people connected to your investment activities?

- ☒ (A) We assessed the country level context of our potential and/or existing investments to understand how this could connect our organisation to negative human rights outcomes

Explain how these activities were conducted:

Amber works to ensure that social safeguards are upheld throughout the investment lifecycle. Key stage gates for this include:

Screening Amber will not work within any sectors that have the potential to lead to Human Rights abuses or with poor ethical, labour and safety practices.

Due Diligence We conduct ESG due diligence on all potential investments and social outcomes are a key element of the process. The criteria for assessment will depend on the nature of an investment (e.g. sector) and we will identify key social considerations on a project-by-project basis. In addition, we draw on a variety of sources to guide due diligence, including the International Finance Coalition (IFC) Performance Standards on Environmental and Social Sustainability, which covers various social aspects, including labour and working conditions and communities.

Asset Management For every new investment, Amber guidelines outline several minimum requirements for the overall governance framework to ensure robust management of ESG. To the extent that the investment does not already have robust equivalent policies in place, Amber aims to implement relevant key ESG policies, including equality, diversity, and inclusion policies, as well as modern slavery/human rights policies, where relevant and legally permissible. In addition to these minimum requirements, a discrete set of ESG stewardship objectives is produced, which may include IFC Industry Sector Guidelines or the Minimum Safeguards set out in the EU Taxonomy.

- ☐ (B) We assessed the sector context of our potential and/or existing investments to understand how this could connect our organisation to negative human rights outcomes
- ☐ (C) We assessed the human rights performance of our potential and/or existing investments to understand how this could connect our organisation to negative human rights outcomes
- ☐ (D) We monitored severe and emerging human rights controversies to understand how this could connect our organisation to negative human rights outcomes
- ☐ (E) We took other steps to assess and manage the actual and potentially negative outcomes for people connected to our investment activities
- ☐ (F) We did not identify and take action on the actual and potentially negative outcomes for people connected to any of our investment activities during the reporting year

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49.1	PLUS	PGS 49	N/A	PUBLIC	Human rights	1, 2

During the reporting year, which stakeholder groups did your organisation include when identifying and taking action on the actual and potential negative outcomes for people connected to your investment activities?

- ☒ (A) Workers
- Sector(s) for which each stakeholder group was included
- ☒ (1) Energy

- ☐ (2) Materials
- ☐ (3) Industrials
- ☐ (4) Consumer discretionary
- ☐ (5) Consumer staples
- ☒ (6) Healthcare
- ☒ (7) Finance
- ☐ (8) Information technology
- ☒ (9) Communication services
- ☒ (10) Utilities
- ☒ (11) Real estate
- ☒ (B) Communities
 - Sector(s) for which each stakeholder group was included
 - ☒ (1) Energy
 - ☐ (2) Materials
 - ☐ (3) Industrials
 - ☐ (4) Consumer discretionary
 - ☐ (5) Consumer staples
 - ☒ (6) Healthcare
 - ☒ (7) Finance
 - ☐ (8) Information technology
 - ☒ (9) Communication services
 - ☒ (10) Utilities
 - ☒ (11) Real estate
- ☒ (C) Customers and end-users
 - Sector(s) for which each stakeholder group was included
 - ☒ (1) Energy

- ☐ (D) Other stakeholder groups

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49.2	PLUS	PGS 47	N/A	PUBLIC	Human rights	1, 2

During the reporting year, what information sources did your organisation use to identify the actual and potential negative outcomes for people connected to its investment activities?

☒ (A) Corporate disclosures

Provide further detail on how your organisation used these information sources:

An ESG due diligence assessment is carried out on all potential investments, which includes a desk-based review of publicly available information, including corporate disclosures.

☒ (B) Media reports

Provide further detail on how your organisation used these information sources:

Amber commissions a management consultancy to monitor media communication applicable to Amber and its investments. This includes in-depth analysis where any potential environmental or social risks are identified, with summary reports provided to Amber.

☒ (C) Reports and other information from NGOs and human rights institutions

Provide further detail on how your organisation used these information sources:

An ESG due diligence assessment is carried out on all potential investments, which includes a review of sector-specific NGO and human rights reports where there is a material risk, for example, supply chain risks in relation to raw materials.

☐ (D) Country reports, for example, by multilateral institutions, e.g. OECD, World Bank

☒ (E) **Data provider scores or benchmarks**

Provide further detail on how your organisation used these information sources:

Where available, we will review the performance of investments against third-party benchmarks, for example the social sections of GRESB.

☐ (F) Human rights violation alerts

☒ (G) **Sell-side research**

Provide further detail on how your organisation used these information sources:

Where required, an ESG due diligence assessment is carried out on potential investments, which will include a policy and process review against Amber's minimum social requirements.

☐ (H) Investor networks or other investors

☐ (I) Information provided directly by affected stakeholders or their representatives

☐ (J) Social media analysis

☒ (K) **Other**

Specify:

Environmental and social impact assessments

Provide further detail on how your organisation used these information sources:

Where applicable for a new development, Amber will review Environmental and Social Impact Assessment reports, including whether social outcomes have been considered and safeguarded in the design and that appropriate stakeholder engagement has been undertaken.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 50	PLUS	PGS 47	N/A	PUBLIC	Human rights	1, 2

During the reporting year, did your organisation, directly or through influence over investees, enable access to remedy for people affected by negative human rights outcomes connected to your investment activities?

☐ (A) Yes, we enabled access to remedy directly for people affected by negative human rights outcomes we caused or contributed to through our investment activities

☐ (B) Yes, we used our influence to ensure that our investees provided access to remedies for people affected by negative human rights outcomes we were linked to through our investment activities

☒ (C) **No, we did not enable access to remedy directly, or through the use of influence over investees, for people affected by negative human rights outcomes connected to our investment activities during the reporting year**

Explain why:

N/A - There have not been any negative human rights issues identified across our investments.

INFRASTRUCTURE (INF)

POLICY

INVESTMENT GUIDELINES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 1	CORE	OO 21, OO 29, OO 30	N/A	PUBLIC	Investment guidelines	1 to 6

What infrastructure-specific ESG guidelines are currently covered in your organisation's responsible investment policy(ies)?

- ☒ (A) Guidelines on our ESG approach tailored to each infrastructure sector and geography where we invest
- ☒ (B) Guidelines on our ESG approach to greenfield investments
- ☒ (C) Guidelines on our ESG approach to brownfield investments
- ☒ (D) Guidelines on pre-investment screening
- ☒ (E) Guidelines on our approach to ESG integration into short-term or 100-day plans (or equivalent)
- ☒ (F) Guidelines on our approach to ESG integration into long-term value-creation efforts
- ☒ (G) Guidelines on our approach to ESG reporting
- ☒ (H) Guidelines on our engagement approach related to the workforce
- ☒ (J) Guidelines on our engagement approach related to contractors
- ☐ (K) Guidelines on our engagement approach related to other external stakeholders, e.g. governments, local communities, and end-users
 - (L) Our responsible investment policy(ies) does not cover infrastructure-specific ESG guidelines

FUNDRAISING

COMMITMENTS TO INVESTORS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 2	CORE	OO 21	N/A	PUBLIC	Commitments to investors	1, 4

For all of the funds that you closed during the reporting year, what type of formal responsible investment commitments did you make in Limited Partnership Agreements (LPAs), side letters, or other constitutive fund documents?

- ☒ (A) We incorporated responsible investment commitments in LPAs (or equivalent) as a standard default procedure
 - (B) We added responsible investment commitments in LPAs (or equivalent) upon a client's request
 - (C) We added responsible investment commitments in side letters upon a client's request
 - (D) We did not make any formal responsible investment commitments for the relevant reporting year
 - (E) Not applicable; we have not raised funds in the last five years

PRE-INVESTMENT

MATERIALITY ANALYSIS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 3	CORE	OO 21	INF 3.1	PUBLIC	Materiality analysis	1

During the reporting year, how did you conduct ESG materiality analysis for your potential infrastructure investments?

☒ (A) We assessed ESG materiality at the asset level, as each case is unique

Select from dropdown list

- ☒ (1) for all of our potential infrastructure investments
 - ☐ (2) for a majority of our potential infrastructure investments
 - ☐ (3) for a minority of our potential infrastructure investments
- ☐ (B) We performed a mix of industry-level and asset-level ESG materiality analyses
- ☐ (C) We assessed ESG materiality at the industry level only
- ☐ (D) We did not conduct ESG materiality analysis for our potential infrastructure investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 3.1	CORE	INF 3	N/A	PUBLIC	Materiality analysis	1

During the reporting year, what tools, standards and data did you use in your ESG materiality analysis of potential infrastructure investments?

- ☐ (A) We used GRI standards to inform our infrastructure ESG materiality analysis
- ☐ (B) We used SASB standards to inform our infrastructure ESG materiality analysis
- ☒ (C) We used the UN Sustainable Development Goals (SDGs) to inform our infrastructure ESG materiality analysis
- ☒ (D) We used the GRESB Materiality Assessment (RC7) or similar to inform our infrastructure ESG materiality analysis
- ☒ (E) We used the environmental and social factors detailed in the IFC Performance Standards (or similar standards used by development finance institutions) in our infrastructure ESG materiality analysis
- ☒ (F) We used climate disclosures, such as the TCFD recommendations or other climate risk and/or exposure analysis tools, to inform our infrastructure ESG materiality analysis
- ☒ (G) We used the UN Guiding Principles on Business and Human Rights (UNGPs) to inform our infrastructure ESG materiality analysis
- ☐ (H) We used geopolitical and macro-economic considerations in our infrastructure ESG materiality analysis
- ☐ (I) We engaged with existing owners and/or managers (or developers for new infrastructure assets) to inform our infrastructure ESG materiality analysis
- ☐ (J) Other

DUE DILIGENCE

 - (2) for a majority of our potential infrastructure investments
 - (3) for a minority of our potential infrastructure investments
- ☒ **(I) Other**
Specify:

Our ESG due diligence process can include all of the listed activities where material to the investment. Level of due diligence is dependent on perceived ESG risks and accompanying categorisation.

Select from dropdown list

 - **(1) for all of our potential infrastructure investments**
 - (2) for a majority of our potential infrastructure investments
 - (3) for a minority of our potential infrastructure investments
- (J) We do not conduct due diligence on material ESG factors for potential infrastructure investments

POST-INVESTMENT

MONITORING

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 9	CORE	OO 21	INF 9.1	PUBLIC	Monitoring	1

During the reporting year, did you track one or more KPIs on material ESG factors across your infrastructure investments?

☒ (A) Yes, we tracked KPIs on environmental factors

Percentage of infrastructure assets this applies to:

- ☐ (1) >0 to 10%
- ☐ (2) >10 to 50%
- ☐ (3) >50 to 75%
- ☐ (4) >75 to 95%
- ☒ (5) >95%

☒ (B) Yes, we tracked KPIs on social factors

Percentage of infrastructure assets this applies to:

- ☐ (1) >0 to 10%
- ☐ (2) >10 to 50%
- ☐ (3) >50 to 75%
- ☐ (4) >75 to 95%
- ☒ (5) >95%

☒ (C) Yes, we tracked KPIs on governance factors

Percentage of infrastructure assets this applies to:

- ☐ (1) >0 to 10%
- ☐ (2) >10 to 50%
- ☐ (3) >50 to 75%
- ☐ (4) >75 to 95%
- ☒ (5) >95%

- ☐ (D) We did not track KPIs on material ESG factors across our infrastructure investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 9.1	PLUS	INF 9	N/A	PUBLIC	Monitoring	1

Provide examples of KPIs on material ESG factors you tracked across your infrastructure investments during the reporting year.

(A) ESG KPI #1

Investments with initiatives aimed at mitigating climate risks

(B) ESG KPI #2

Robust corporate governance

(C) ESG KPI #3

Investments with an environmental management system

(D) ESG KPI #4

Investments that are net zero, aligned to net zero or aligning to net zero by 2030

(E) ESG KPI #5

Investments with health and safety management system

(F) ESG KPI #6

Investments with initiatives to improve health and safety performance

(G) ESG KPI #7

Investments with an environmental management system

(H) ESG KPI #8

Operating companies that transparently disclose delivery of diversity, equality, and inclusion ('DEI') policies

(I) ESG KPI #9

(J) ESG KPI #10

What processes do you have in place to support meeting your targets on material ESG factors for your infrastructure investments?

☒ **(A) We use operational-level benchmarks to assess and analyse the performance of assets against sector performance**

Select from dropdown list

- ☐ (1) for all of our infrastructure investments
- ☒ **(2) for a majority of our infrastructure investments**
- ☐ (3) for a minority of our infrastructure investments

☒ **(B) We implement international best practice standards such as the IFC Performance Standards to guide ongoing assessments and analyses**

Select from dropdown list

- ☐ (1) for all of our infrastructure investments
- ☒ **(2) for a majority of our infrastructure investments**
- ☐ (3) for a minority of our infrastructure investments

☒ **(C) We implement certified environmental and social management systems across our portfolio**

Select from dropdown list

- ☐ (1) for all of our infrastructure investments
- ☐ (2) for a majority of our infrastructure investments
- ☒ **(3) for a minority of our infrastructure investments**

☒ **(D) We make sufficient budget available to ensure that the systems and procedures needed are established**

Select from dropdown list

- ☒ **(1) for all of our infrastructure investments**
- ☐ (2) for a majority of our infrastructure investments
- ☐ (3) for a minority of our infrastructure investments

☒ **(E) We hire external verification services to audit performance, systems, and procedures**

Select from dropdown list

- ☐ (1) for all of our infrastructure investments
- ☐ (2) for a majority of our infrastructure investments
- ☒ **(3) for a minority of our infrastructure investments**

☒ **(G) We develop minimum health and safety standards**

Select from dropdown list

- ☒ **(1) for all of our infrastructure investments**
- ☐ (2) for a majority of our infrastructure investments
- ☐ (3) for a minority of our infrastructure investments

☒ **(H) We conduct ongoing engagement with all key stakeholders, e.g. local communities, NGOs, governments, and end-users**

Select from dropdown list

- ☒ **(1) for all of our infrastructure investments**
- ☐ (2) for a majority of our infrastructure investments
- ☐ (3) for a minority of our infrastructure investments

☒ (I) Other

Specify:

We assess portfolio-level performance against ESG benchmarks

Select from dropdown list

- (1) for all of our infrastructure investments
- (2) for a majority of our infrastructure investments
- (3) for a minority of our infrastructure investments
- (J) We do not have processes in place to help meet our targets on material ESG factors for our infrastructure investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 10.1	PLUS	INF 10	N/A	PUBLIC	Monitoring	1, 2

Describe up to two processes you put in place during the reporting year to support meeting your targets on material ESG factors.

(A) Process one

During the period, Amber has formalised its Environmental and Social Management System ('ESMS') into a single group Policy document which applies across its mandates and investments.

The ESMS Policy outlines the framework through which Amber integrates environmental and social ('E&S') considerations into its investment activities. As a responsible infrastructure investor, Amber recognises the critical role of sustainable development in creating long-term value for stakeholders while mitigating risks associated with environmental and social factors.

The ESMS Policy provides a structured approach to identifying, assessing, and managing E&S risks and opportunities throughout the investment lifecycle. It ensures that Amber's investments align with international best practices, regulatory requirements, and the expectations of our stakeholders, including investors, regulators, and local communities.

This ESMS Policy applies to all investment activities undertaken by Amber, including due diligence, asset management, and divestment. It sets out clear roles and responsibilities for internal teams, investee companies, and relevant stakeholders to ensure effective implementation and oversight.

This ESMS Policy provides a broad framework for integrating environmental and social considerations at the fund level. However, individual funds will, where required, have their own ESMS in place to address specific regulatory requirements, LP and other stakeholder requirements, asset classes, and investment strategies. This ensures that E&S management is appropriately tailored to the unique characteristics and risks of each fund while maintaining alignment with the overarching principles set out in this document.

By embedding this ESMS Policy into our investment approach, Amber aims to foster sustainable infrastructure development that generates long-term value while supporting global efforts to address environmental and social challenges.

(B) Process two

During the year, Amber has strengthened the definitions and approach for the International Public Partnership's ('INPP') ESG Governance KPI. The Governance KPI is aimed at ensuring all investments are actively managed to reflect Amber and INPP's aim to commit to the highest standards of corporate governance. Governance arrangements are guided by the type of investment and ownership structure, but the investment must demonstrate a minimum set of policies, processes and practices which the guidance document sets out in detail. By ensuring that robust governance measures are in place, Amber can mitigate risks related to conflicts of interest, financial crime, cybersecurity, and social inequalities, while also upholding the ethical standards required by the UNGC Principles.

Amber applied this enhanced governance guidance, when it conducted a deep-dive review of cyber security governance of INPP's portfolio companies, comparing their policies and processes against a set of best-practice criteria. This review helped the Company to understand current cyber security practices across the investment portfolio and provides a basis for tracking progress going forward.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 11	CORE	OO 21	N/A	PUBLIC	Monitoring	1, 2

Post-investment, how do you manage material ESG risks and ESG opportunities to create value during the holding period of your investments?

☒ **(A) We develop asset-specific ESG action plans based on pre-investment research, due diligence and materiality findings**

Select from dropdown list

- ☒ **(1) for all of our infrastructure investments**
- ☐ (2) for a majority of our infrastructure investments
- ☐ (3) for a minority of our infrastructure investments

☒ **(B) We adjust our ESG action plans based on performance monitoring findings at least yearly**

Select from dropdown list

- ☒ **(1) for all of our infrastructure investments**
- ☐ (2) for a majority of our infrastructure investments
- ☐ (3) for a minority of our infrastructure investments

☒ **(C) We, or the external advisors that we hire, support our infrastructure investments with specific ESG value-creation opportunities**

Select from dropdown list

- ☒ **(1) for all of our infrastructure investments**
- ☐ (2) for a majority of our infrastructure investments
- ☐ (3) for a minority of our infrastructure investments

☐ **(D) Other**

- ☐ **(E) We do not manage material ESG risks and opportunities post-investment**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 12	PLUS	OO 21	N/A	PUBLIC	Monitoring	1, 2

Describe how you ensure that material ESG risks are adequately addressed in the infrastructure investments where you hold a minority stake.

ESG is integrated throughout the investment process of all investments. For minority investments, Amber's ability to influence is sometimes limited however we ensure that ESG risks are adequately addressed through the following stages:

DUE DILIGENCE For every new investment, including minority investments, Amber aims to include several minimum requirements for the overall governance framework to ensure robust management of ESG. To the extent the investment does not have robust equivalent policies already in place, Amber endeavours to implement relevant key ESG policies as part of a post-investment action plan wherever possible.

Examples of such key policies include:

- ESG/sustainability policy
- Health & safety policy
- Environmental policy
- Equality, diversity and inclusion policy
- Modern slavery/human rights policy
- Confirmation of appropriate resourcing for management of environmental, health and safety and broader social issues
- Allocated responsibility for ESG/sustainability at the Board level This categorisation then drives the level of due diligence undertaken, including assessment against emerging and future trends that could impact the long-term viability of the investment. The outcomes of this due diligence are included in our Capital Approval Process, which presents all material issues to the relevant Investment Committee ahead of final decision-making. ESG due diligence findings and action plan are presented to the Investment Committee for consideration and approval. The outcomes of ESG due diligence will directly inform deal documentation and approach to investment management. Specific ESG clauses are built into shareholder agreements where possible to ensure the delivery of required outcomes. This may include reporting in line with EU Taxonomy, SFDR and TCFD requirements, alongside the delivery of the Environmental and Social Action Plan, which may include, but not be limited to:

EXECUTION

- Measures required to meet Amber's minimum ESG requirements;
- Environmental and social safeguarding;
- Business strategy to align with EU Taxonomy Performance Criteria; and

- Climate risk management, including net zero strategy development. The way Amber manages the investment varies according to investment type, for our minority investments, including engagement on material ESG risks, is typically concentrated in the screening and due diligence phase. In addition, we will monitor the ESG performance for these investments through our annual data collection and reporting process. This includes ensuring that the investments maintain adherence to our minimum ESG requirements outlined above.

ACTIVE MANAGEMENT

MONITORING We collect ESG data from our investments to track ESG performance and ensure that risks are correctly managed. For minority investments, we engage our investment partners to request data wherever possible. Where data is unavailable, we will work with our investment partners to establish the correct reporting channels going forward.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 13	PLUS	OO 21	N/A	PUBLIC	Monitoring	2

Describe how your ESG action plans are defined, implemented and monitored throughout the investment period.

ESG is integrated throughout the investment process in line with the following key steps.

RESEARCH AND INNOVATION Our specialist teams undertake targeted research that examines the potential for new investment and fund opportunities. This future-focused approach complements our culture of investment origination to ensure that we are always pursuing investment opportunities that will create value over the long term and that we are pioneer in what we do – Amber seeks to take a ‘first mover’ advantage in the infrastructure market and has historically done so.

SCREENING AND DUE DILIGENCE Consideration of ESG risks and opportunities is a formal element of the Amber investment origination process. Every investment opportunity undergoes a detailed screening and due diligence process. In line with good international industry practice, Amber categorises potential investments as part of this process. Categorisation draws on the IFC’s environmental and social categorisation process, and includes the following categories:

- Category A – Investments that have the potential to cause adverse environmental and social risks and/or impacts that are diverse, irreversible or unprecedented in the absence of mitigation;
- Category B – Investments with potential limited adverse environmental and social risks and/or impacts that are few in number, generally site-specific, largely reversible and readily addressed through mitigation measures; and
- Category C – Investments with minimal or no adverse environmental and social risks and/or impacts.

This categorisation then drives the level of due diligence undertaken, including assessment against emerging and future trends that could impact the long-term viability of the investment. The outcomes of this due diligence are included in our Capital Approval Process, which presents all material issues to the relevant Investment Committee ahead of final decision-making.

EXECUTION ESG due diligence findings and action plan are presented to Investment Committee for consideration and approval. The outcomes of ESG due diligence will directly inform deal documentation and approach to investment management. Specific ESG clauses are built into shareholder agreements where possible to ensure the delivery of required outcomes. This may include reporting in line with EU Taxonomy, SFDR and TCFD requirements, alongside the delivery of the Environmental and Social Action Plan, which may include, but not be limited to:

- Measures required to meet Amber’s minimum ESG requirements;
 - Environmental and social safeguarding;
 - Business strategy to align with EU Taxonomy Performance Criteria; and Climate risk management, including net zero strategy development.
- Amber seeks influence in all investments, whether through absolute holding or a comprehensive set of consent rights over reserved matters. Members of the investment team work closely with asset management representatives to manage risk, drive operational and financial best practice, monitor performance and to optimise returns to investors and our wider stakeholders. Governance arrangements are guided by the type of investment and ownership structure, as opposed to the sector, which typically drives the management of environmental and social aspects. We draw on Good International Industry Practice to guide the development of Environmental and Social Action Plans. In the case of our low-carbon funds, we ensure they align with the relevant European Regional Development Fund requirements.

ACTIVE MANAGEMENT

MONITORING Amber’s asset management team is responsible for monitoring assets and typically provide formal monitoring reports on a quarterly basis. Reports are produced to inform and update senior managers in Amber of any underlying issues on the assets that may require additional time and resource to resolve. All asset managers follow a ‘no-surprise’ approach and include any matters that could adversely impact on health and safety, reputation, valuation or distributions, escalating in real time if required.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

- ☐ (3) for a minority of our infrastructure investments

☒ **(G) We apply penalties or incentives to improve ESG performance in management remuneration schemes**

Select from dropdown list

- ☐ (1) for all of our infrastructure investments
- ☒ **(2) for a majority of our infrastructure investments**
- ☐ (3) for a minority of our infrastructure investments

☐ **(H) Other**

☐ **(I) We do not ensure that adequate ESG-related competence exists at the asset level**

Additional context to your response(s): (Voluntary)

Please note that responses above relate to investments where relevant. For example, we would find third party support for all investments where required. However, we may not provide third-party support if not relevant.

STAKEHOLDER ENGAGEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
INF 15	PLUS	OO 21	N/A	PUBLIC	Stakeholder engagement	1, 2

How do you ensure that appropriate stakeholder engagement is carried out during both due diligence for potential investments and the ongoing monitoring of existing investments?

Consideration of ESG risks and opportunities is a formal element of the Amber investment deal process for new investments and for development projects of existing projects where additional finance is required. Every investment opportunity undergoes a detailed screening and due diligence process. In line with good international industry practice, Amber categorises potential investments as part of this process. Categorisation draws on the IFC's environmental and social categorisation process, and includes the following categories:

- Category A – Investments that have the potential to cause adverse environmental and social risks and/or impacts that are diverse, irreversible or unprecedented in the absence of mitigation;
- Category B – Investments with potential limited adverse environmental and social risks and/or impacts that are few in number, generally site-specific, largely reversible and readily addressed through mitigation measures; and
- Category C – Investments with minimal or no adverse environmental and social risks and/or impacts.

This categorisation then drives the level of due diligence undertaken and the level of stakeholder engagement that is appropriate for the project which will be assessed.

Category A Category A Investments are those that have the potential to have significant environmental social impacts in the absence of mitigation, or face risk of obsolescence due to emerging trends and regulation. These include investments which could have the following characteristics:

- significant air emissions (including of greenhouse gases), very significant use of water or generation of a significant volume of liquid effluents, generation of hazardous or other solid wastes or resource use inefficiencies;
- transactions that could generate adverse community health and safety impacts;
- the acquisition and/or use of land that could lead to the economic or physical displacement of communities;
- significant potential negative impacts on biodiversity, habitat or ecosystem services, including provisioning services such as food or timber, or regulating services such as water flow regulation and flood protection;
- potential impacts to marginalised or vulnerable peoples;
- potential impacts to cultural heritage; or

other significant negative environmental or social impacts For Category A investments, the due diligence will include a review of the projects alignment with the IFC's Performance Standards on Environmental and Social Sustainability. For development projects, the Performance Standard 1 includes best-practice guidance on how stakeholder engagement should be carried out including multi stakeholder consultative processes where required. The externally commissioned ESG due diligence provider will assess whether the investment has undertaken the appropriate level of stakeholder engagement for the type of project, and whether this aligns with IFC's performance standards. Any shortcomings in the engagement will be set out in the ESG due diligence providers report. Investments with potential limited adverse environmental and social risks and/or impacts that are few in number, generally site-specific, largely reversible and readily addressed through mitigation measures. There can be a range in the scale of potential environmental and social risks and impacts within Projects classified as Category B. In general terms, higher risk Category B Projects will be treated similarly to Category A Projects. Amber shall, at its own discretion, determine the appropriate level of assessment documentation, review, and monitoring required to address these risks and impacts. Examples of Category B include small-medium size construction projects, data centres and larger PPPs in OECD countries.

Category B

Category C Investments with minimal or no adverse environmental and social risks and/or impacts. Examples of Category C investments may include operational social infrastructure PPPs, telecommunications projects not involving new physical infrastructure, equity in companies supporting the transition to a low carbon economy.

How did your organisation verify the information submitted in your PRI report this reporting year?

- ☒ (A) We conducted independent third-party assurance of selected processes and/or data related to the responsible investment processes reported in our PRI report, which resulted in a formal assurance conclusion
- ☐ (B) We conducted a third-party readiness review and are making changes to our internal controls or governance processes to be able to conduct independent third-party assurance next year
- ☒ (C) We conducted an internal audit of selected processes and/or data related to the responsible investment processes reported in our PRI report
- ☒ (D) Our board, trustees (or equivalent), senior executive-level staff (or equivalent), and/or investment committee (or equivalent) signed off on our PRI report
- ☒ (E) Our responses in selected sections and/or the entirety of our PRI report were internally reviewed before submission to the PRI
- ☐ (F) We did not verify the information submitted in our PRI report this reporting year

THIRD-PARTY EXTERNAL ASSURANCE

CBM 3	PLUS	CBM 1	N/A	PUBLIC	Third-party external assurance	6

Provide details of the third-party external assurance process regarding the information submitted in your PRI report.

(1) Description of the third-party external assurance process

Amber-managed low-carbon funds LEEF, MEEF, GNDF and SPRUCE, have specific investment thresholds to ensure that investments can meet strict non-financial performance targets. This includes a stringent Measurement Monitoring & Verification process ('M&V') to ensure funds meet its energy and carbon criteria. The M&V process is applied throughout the investment process, from the initial concept stages to post practical completion.

Amber's in-house technical experts undertake the first-stage review on energy and carbon criteria. Following initial project approval appoints a third-party technical advisor to verify the energy and carbon savings and monitor the progress of the project during the construction period.

Each project has a bespoke M&V plan developed in accordance with the International Performance Measurement and Verification Protocol methodology or equivalent. This identifies anticipated energy and carbon savings and other relevant outputs and the method by which they will be quantified. As a fund manager to LEEF, GNDF, MEEF and SPRUCE, Amber is incentivised to deliver projects that meet additional output targets, including renewable energy generation, number of enterprises supported and number of houses improved.

Each project is independently verified by reputable organisations, including Deloitte, Arup, Turner & Townsend, Aecom and Verco.

(2) Assurance standard(s) used by the third-party assurance provider

- ☐ (A) PAS 7341:2020
- ☐ (B) ISAE 3000 and national standards based on this
- ☐ (C) Dutch Standard 3810N (Assurance engagements regarding sustainability reports)
- ☐ (D) RevR6 (Assurance of Sustainability)
- ☐ (E) IDW AsS 821 (Assurance Standard for the Audit or Review of Reports on Sustainability Issues)
- ☐ (F) Accountability AA1000 Assurance Standard (AA1000AS)
- ☐ (G) IFC performance standards
- ☐ (H) SSAE 18 and SOC 1
- ☐ (I) Other national auditing/assurance standard with guidance on sustainability; specify:
- ☐ (J) Invest Europe Handbook of Professional Standards
- ☐ (K) ISAE 3402 Assurance Reports on Controls at a Service Organisation
- ☐ (L) AAF 01/20
- ☐ (M) AAF 01/06 Stewardship Supplement
- ☐ (N) ISO 26000 Social Responsibility
- ☐ (O) ISO 14065:2020 General principles and requirements for bodies validating and verifying environmental information
- ☐ (P) ASAE 3410 Assurance Engagements on Greenhouse Gas Statements
- ☐ (Q) PCAF
- ☐ (R) NGER audit framework (National Greenhouse and Energy Reporting)
- ☐ (S) Auditor's proprietary assurance framework for assuring RI-related information
- ☒ (T) Other greenhouse gas emissions assurance standard; specify:

International performance Measurement & Verification Protocol

CBM 4	CORE	OO 21, CBM 1	N/A	PUBLIC	Internal audit	6

What responsible investment processes and/or data were audited through your internal audit function?

- ☐ (A) Policy, governance and strategy
- ☒ **(G) Infrastructure**
- Select from dropdown list:
- ☒ **(1) Data internally audited**
 - ☐ (2) Processes internally audited
 - ☐ (3) Processes and data internally audited

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
CBM 5	PLUS	CBM 1	N/A	PUBLIC	Internal audit	6

Provide details of the internal audit process regarding the information submitted in your PRI report.

Amber has a data collection and quantification management process, which includes an internal quality assurance audit process. This process aims to assess the quality of the input data, the integrity of formulas in Amber's calculation tool and the validity of the final output data. There are controls measures embedded into each stage of the data collection process, including (but not limited to) year-on-year variance checks; sign off requirements from departments leads; and manual replicability tests. All final output information is signed off by Amber's head of ESG, which includes checking that the internal audit steps have been carried out sufficiently.

In addition, this year Amber's ESG data collection and quantification process was selected as part of a formal controls review process, and an independent third-party was commissioned to undertake this review. The third party reviewed the approach and methodology for Amber's ESG data collection and quantification process. This included reviewing Amber's data collection documents, the calculation tool and the management documentation that sits behind this process. The findings from the review concluded that the controls in place are appropriate for providing stakeholders with accurate ESG information.

INTERNAL REVIEW

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
CBM 6	CORE	CBM 1	N/A	PUBLIC	Internal review	6

Who in your organisation reviewed the responses submitted in your PRI report this year?

- ☐ (A) Board, trustees, or equivalent
- ☒ **(B) Senior executive-level staff, investment committee, head of department, or equivalent**
- Sections of PRI report reviewed
- ☒ **(1) the entire report**
 - ☐ (2) selected sections of the report

- (C) None of the above internal roles reviewed selected sections or the entirety of the responses submitted in our PRI report this year
